Interview for Engineering & Data

(Note: this is an audio-only Google Meet; please simply disable your camera when joining).

This initial call is to answer questions you have about Enveritas and the role, and to learn about what you are looking for in your next job. We will spend time answering your questions about the team and Enveritas. We'll also ask some questions about your engineering background to see if scheduling our technical **interviews** makes sense.

Please share which role you are interviewing for -- as well as if you have any other notes we should know for making our call with you as comfortable as possible. (Alas, our Calend.ly setup doesn't sync this info for us... thanks!); Backend Software Engineer - Python/Postgres [Remote / Global]
